

# Karan Kumar

## SENIOR AI ENGINEER

✉ Karan97611@gmail.com    📞 +91-9761182859    📍 Greater Noida, India

AI Engineer with 7 years of IT experience, including 2 years in Software Testing and Test Automation and 5 years in developing AI-driven applications and intelligent automation solutions. Expertise in Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, Vector Databases, and Generative AI architectures. Proficient in Python, NumPy, Pandas, and building scalable systems for document intelligence, semantic search, knowledge retrieval, and workflow automation. Experienced with TensorFlow and Scikit-learn for machine learning model development, data analysis, and predictive solutions. Proven ability to design, deploy, and optimize production-grade AI systems that drive innovation, operational efficiency, and business value.

## SKILLS

Machine Learning   Natural Language Processing   Python   TensorFlow   Data Analysis

Model Deployment   Cloud Computing   Creativity   Problem Solving   Leadership   Numpy

Pandas   RAG   Langchain

## EXPERIENCE

### Senior Project Engineer

**Wipro Ltd.** Oct 2020 - Present

- Developed Python scripts for data cleaning (-20% errors), assisted predictive models (+10% accuracy), and built image classification (-35% review time).
- Managed data preprocessing strategies, reducing data redundancy by 20%
- Enhanced chatbot functionality, improving customer query resolution rates by 25%
- Implemented data preprocessing techniques which improved model training efficiency by 30%.
- Contributed to integration of AI solutions into existing products, boosting market competitiveness.
- Performed A/B testing to optimize algorithms, achieving a 15% improvement in performance metrics.
- Designed and Implemented a deep learning model that improved predictive accuracy by 40%.
- Led a cross-functional team in deploying an NLP-based solution enhancing customer support efficiency by 30%.
- Optimized existing algorithms, resulting in a 25% reduction in computational costs.
- Conducted workshops on AI best practices, training over 50 engineers in advanced techniques.
- Developed scalable machine learning pipelines, reducing data processing time by 50%.
- Conducting risk assessments and implementing mitigation strategies

### QA Automation engineer

**Wipro Ltd.** Jul 2018 - Sep 2020

- Designed and executed detailed test plans, test cases, and test scenarios based on functional specifications and user stories.
- Drove a 25% reduction in post-release defects by creating and executing comprehensive test plans for key Telecom modules within an Agile Scrum environment.
- Validated 50+ REST APIs, automated regression with Java/Selenium, boosting coverage 70% and cutting manual effort 80%, saving 20+ hours/sprint.
- Built and managed CI/CD pipelines with Jenkins/Github, automating 90% deployments, accelerating delivery 40%, and reducing manual intervention via automated build, deploy, and test.
