

KARAN KUMAR – SENIOR AI ENGINEER

Professional Summary

Senior AI Engineer with 7+ years of IT experience including 5+ years in Artificial Intelligence, Generative AI, Machine Learning, Intelligent Automation, and Enterprise AI Solutions. Expertise in LLMs, RAG, AI Agents, LangChain, LangGraph, Vector Databases, Prompt Engineering, FastAPI, Python, TensorFlow, Scikit-Learn, AWS, Docker, and MLOps. Proven experience designing production-grade AI systems for document intelligence, semantic search, workflow automation, knowledge retrieval, and enterprise-scale automation.

Core Skills

Python, SQL, Java, Generative AI, LLMs, RAG, LangChain, LangGraph, CrewAI, AutoGen, Ollama, Prompt Engineering, AI Agents, ChromaDB, FAISS, Pinecone, Vector Databases, Semantic Search, TensorFlow, Scikit-Learn, NLP, Deep Learning, Computer Vision, FastAPI, REST APIs, AWS (EC2, S3, Bedrock, SageMaker), Docker, Kubernetes, Jenkins, GitHub Actions, MLflow, CI/CD, NumPy, Pandas, MySQL.

Wipro Ltd. | Senior Project Engineer / Senior AI Engineer | Oct 2020 – Present

- Designed and implemented enterprise RAG solutions using LangChain, ChromaDB, FAISS and LLMs.
- Developed AI-powered document intelligence platforms processing PDF, DOCX, images and structured data.
- Built semantic chunking and embedding pipelines improving retrieval accuracy and response relevance.
- Developed AI assistants using Ollama-hosted LLMs reducing manual search effort significantly.
- Created FastAPI-based AI microservices for scalable deployment of GenAI applications.
- Implemented OCR and intelligent extraction workflows for invoices, reports and visual documents.
- Built vector search architectures for knowledge retrieval and enterprise search solutions.
- Optimized prompts and retrieval strategies improving answer quality and reducing hallucinations.
- Integrated AI solutions into business workflows improving productivity and operational efficiency.
- Mentored engineers on RAG architectures, prompt engineering and AI best practices.

Wipro Ltd. | QA Automation Engineer | Jul 2018 – Sep 2020

- Automated web applications using Selenium WebDriver and Java.
- Validated 50+ REST APIs and improved test coverage significantly.
- Built CI/CD pipelines using Jenkins and GitHub.
- Reduced manual testing effort through automation frameworks and regression suites.

Key AI & GenAI Projects

Enterprise RAG Platform

- Built document question-answering platform using LangChain, ChromaDB, FastAPI and Ollama.
- Implemented semantic chunking, embedding generation and vector retrieval.
- Supported PDF, DOCX, image and spreadsheet ingestion workflows.

Multi-Agent AI Assistant

- Developed agentic workflows using LangGraph and AI agents.
- Automated document analysis, summarization and workflow orchestration.

Vision AI Document Processing System

- Built OCR and intelligent extraction pipeline for charts, invoices and business documents.
- Generated structured outputs and automated downstream workflows.

Machine Learning Solutions

- Developed predictive models using TensorFlow and Scikit-Learn.
- Performed feature engineering, model evaluation and deployment.

Education

M.Tech – BITS Pilani (2019 – 2022)

BCA – CCS University, Meerut (2015 – 2018)

Certifications

AWS Certified Cloud Practitioner

AWS Certified AI Practitioner

GitHub Copilot Certification

Keywords Optimized for ATS

Generative AI, LLM Engineer, AI Engineer, RAG, Agentic AI, LangChain, LangGraph, CrewAI, AutoGen, Vector Database, ChromaDB, Pinecone, FAISS, FastAPI, Prompt Engineering, Semantic Search, Knowledge Retrieval, MLOps, TensorFlow, Scikit-Learn, Docker, Kubernetes, AWS Bedrock, SageMaker.
